About Me

After graduating in 2017 I decided to take some time to pursue being an esports commentator. I am eager to experience what working in a professional software engineering environment is truly like, while expanding my skills as a developer. Within the realm of software engineering and computer science I am particularly passionate about AI/machine learning, networking and security.

Education

University of Queensland

March 2012 – July 2017: Bachelor of Engineering (Software Engineering)
Honours Class 1 (GPA 6.1)
Academic transcript available on request

Experience

Dota 2 Commentator: June 2014 – Present

Working as a freelance commentator in both analytical and play-by-play roles I've had the opportunity to work alongside companies such as Valve Software, Beyond the Summit and ESL to provide on-camera coverage of a number of Dota 2 esports events. Notable events include ESL One Mumbai 2019 (146k peak concurrent viewers) ESL One Katowice 2019 (144k peak concurrent viewers) and The International 2014 (2 million peak concurrent viewers).

Senex Energy: August 2016 – June 2017

Position: IT Intern

Providing final resolution of desktide IT support tickets, onboarding tasks such as imaging hardware to be deployed and managing Active Directory permissions. Development of business processes for the IT team.

Nightowl Taringa: November 2011 – February 2013

Position: Shift Supervisor

Serving customers, stocking shelves, general cleaning, ordering.

Skills

- Proficient in: Java, Ruby
- Familiar with: HTML, CSS (SASS), JavaScript, Ruby on Rails, *NIX systems (Ubuntu/Linux Mint)
- Some exposure: Python, Ethereum's Solidity language

Interests

Member of Ashgrove/The Gap Leos volunteering club, boardgames and TTRPG's, esports
